

SHARING YOUR ANALYSIS:

Be prepared to share information you have included in your *Analysis and Interpretation of Data* table. As you present your information: 1) Be prepared to discuss your information related to all 3 crater characteristics, 2) Be prepared to show any related data displays that allow you to illustrate your specific observations and help support your interpretations, and 3) Be prepared to discuss any limitations related to your research (not enough data, needed more area to be shown in images, something else?).

As you listen to each group's presentation, be prepared to contribute additional information as you see fit. In the table below, fill in the names of the planetary worlds you have investigated. Take notes so you can later draw conclusions about this research.

SUMMARY TABLE (use additional paper, as necessary)

Crater Diameter				
Crater Type				
Crater Classification				
Other Notes or Limitations
